## Birds of Prey Night and Day

The owls are back! And this time they're being joined by other birds of prey who share their habitats. Explore the world of raptors that share the same habitat but are active at different times - day and night. Falcons, hawks, and eagles often occupy the same territories as nocturnal owls: hardwood or mixed forests, pastures and marshlands, and even our suburbs and urban areas. Learn about what makes each species successful in its environment and the special adaptations they have for being diurnal or nocturnal. Held outside, weather permitting. In the event of inclement weather, program will be held at the senior center. Please register.
