

MES Vision

To inspire wonder, awe, and curiosity and to motivate young minds to embrace learning

MES Mission Statement

In a partnership of family, school, and community, our mission is to educate, challenge and inspire each individual to excel and become a contributing member of society.

MES Community Beliefs

In order to prepare for a lifetime of learning, schools should foster in each individual a strong desire to develop an inquiring, self-directed, and creative mind.

All students should be educated in a safe and secure learning environment that provides appropriate facilities, personnel, and programs.

High expectations, goal setting, and hard work lead to success. Risks and challenges are opportunities to experience growth.

Each individual is important and unique and has a shared responsibility for contribution to the greater community. Respect for an individual's opinions and interests builds self-esteem and self-confidence. Knowledge of and respect for diversity is critical in our ever-changing multicultural world.

Curricula should be designed, implemented, and continually assessed to enable all students to realize their full potential.

All educational programs and services should incorporate current practices and contemporary research, materials, and equipment.

Attracting and retaining a highly qualified staff is essential to serving students and the district will provide appropriate supervision, evaluation, and training for the continual improvement and updating of skills and knowledge.

Education is a partnership shared by family, school, and the community that is essential for a learner's success. Supporting families in their role enhances the likelihood of a child's success. Open communication and honesty are essential to effective partnerships.

It is a shared responsibility of family, school, and community to ensure that all students will develop and understand their ethical, cultural, aesthetic, and intellectual values and respect those of others.

Collective community support, involvement, and resources, combined with individual initiative, are essential for excellence in education and should be encouraged and actively sought.
